

RUBBERWAY® Permeable Rubber Paving Solutions

Rubberway® Pervious Pavements

Rubberway® paving systems are constructed of a recycled crumb rubber granulate with an optional colored EPDM wear course, which creates a resilient, open grid surface, allowing for rapid drainage.

We offer many innovative environmental advancements for surfacing and maintenance needs.

Diverts Tires from Local Landfills

Quick Filtration and Drainage

Manages Storm Water Run Off

Water Repellant Binding Characteristics

Freeze/Thaw Friendly

No Heavy Metal Leaching

Reduces Liability Risks

Versatile Design Options

Handles Heavy Weight Loads

Light Vehicular Traffic Accessible

Rubberway® Sidewalk

Applications

- sidewalks porous pavements
- pathways stormwater management
- tracks blacktops
- trails erosion control
- cart paths emergency lanes
- drive ways parking lots

ECO-EFFICIENT

SUSTAINABLE

FLEXIBLE
