

# Windmill 2014 Poinsettias

Windmill Gardens is proud to offer the finest quality poinsettias available. Decades of growing have given us the knowledge and experience to provide you with superior quality plants. Colors vary from year to year. See below for a sampling. Shop early for best selections.

## General Care information

**Location and Temperature** – The poinsettia thrives on indirect, natural daylight. Exposure to at least six hours daily is recommended. If direct sun cannot be avoided, diffuse with a light shade or sheer curtain. To prolong the bright color of the poinsettia bracts, daytime temperatures should not exceed 70 degrees temperature. Avoid placing the plants near drafts, excess heat or the dry air from appliances, fireplaces or ventilating ducts.

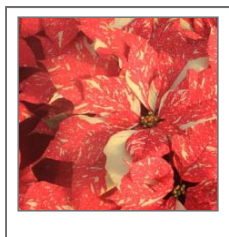

**Water and fertilizer** – Poinsettias require moderately moist soil. Water the plants thoroughly when soil surface feels dry to the touch. Remove the plant from decorative pots or covers, and water enough to completely saturate the soil. Do not allow the poinsettia to sit in any standing water. It is not necessary to fertilize the poinsettia when it is in bloom.

Premium Whites

Picasso

Red Glitter

Marble

Carousel

Assorted Reds

Tapestry

Christmas Pink

Princettia

Sparkling Punch
