

Unsecured construction site at Ridgedale Center (July 11, 2014)

Contractors working at Ridgedale Center have repeatedly failed to protect the shopping public from potential construction hazards. For your safety and your children's safety, we encourage you to **WATCH OUT** for electrical hazards, fall hazards, hazardous construction debris, and unsecured construction sites.

We have provided a map of Ridgedale Center indicating areas of the mall where construction hazards have been identified. Please be aware that construction activity changes daily and we can provide no assurance that areas not designated on the map are free of construction hazards.

Shoppers are encouraged to let retailers engaged in renovations, including American Eagle, Aveda, Helzberg Diamonds, Pac Sun and Victoria's Secret know that safety is a top priority for you as a customer.

For more information on construction hazards at Ridgedale Center and what you can do to help, please contact the Minneapolis Building and Construction Trades Council at 612-379-4234 or like us on Facebook at MplsBCTC.
